Mobile App Developer

Job Description: At Baba Computers, WE are looking for a strong mobile app developer who welcomes both engineering and maintenance tasks. If you're passionate about mobile platforms and translating code into user-friendly apps, we would like to meet you. As a Mobile developer, you'll collaborate with internal teams to develop functional mobile applications, while working in a fast-paced environment.

Ultimately, you should be able to design and build the next generation of our mobile applications.

Educational Qualification

- A bachelor's degree in computer science or information systems.

Skills & Requirements

- Proficient knowledge of relevant computer languages for Android, IOS, and Windows devices.

- A portfolio of applications you have created or contributed to.

- Ability to multitask.

- Ability to program in at least one programming language (e.g. JavaScript or Python).

- Deep understanding of core programming principles, including design.

- Superior analytical skills with a good problem-solving attitude.

- Ability to interpret and follow technical plans.

- Ability to perform in a team environment.

- Project management experience.

- Experience working as part of a development team.

- Certification in application development.

- Critical and analytical thinking skills .

- Keen attention to detail.

- Excellent time management.

- App design.

- Excellent interpersonal skills.

- Software design.

- Coding.

- Native app writing ability.

- Backend web services knowledge.

- Knowledge of UX and UI.

Work Responsibilities:

- Create and maintain mobile applications.

- Keep abreast of the latest technology for mobile applications.

- Work with computer engineers to brainstorm new applications.

- Create UI tests to source analytics.

- Build software that fulfills specific needs.

- Find solutions to security threats, viruses, or errors that might hinder the performance of applications.

- Carry out regular security and performance checks.

- Remain current on technology trends to keep our software as innovative as possible.

- Stay on track of the application lifecycle to ensure necessary updates are completed on time.

- Build and maintain both web and mobile applications for our organization.

- Collaborate with the rest of the team to ensure applications align with the organization's goals, as well as customer needs.

- Oversee the performance of applications to ensure they're always running properly.

- Improve our overall application development process and continuously find ways to advance our apps.

Gender - Both

Experience – 5 to 15 years

Salary – 15000 to 20000
